

FOLDED PANELS

The Folded panel is a traditional, cost effective fencing option available in a range of strengths and heights

The Folded fence offers strength and durability as a result of its fully welded construction and 100% hot dip galvanizing. This makes the fence exceptionally strong and corrosion resistant, in any climate or condition the fence will have a long life span.

As well as providing a tidy boundary around your garden, the Folded fence will suit most applications where a permanent boundary is required, such as around the home, public parks or car yards. Folded Panels have the added safety benefit of see-through visibility to observe play activity.

The Folded range of landscape and pool panels are available in 6.5mm wire verticals and 8mm wire verticals for the Motorway, Kindi and Security panels.

With an anti scale distance of 960mm the panel is fairly flex resistant and fully compliant to the New Zealand swimming pool legislation.

The Folded panel is available in 1.0m, 1.2m, 1.5m and 1.8m heights.

Folded panels can be coloured to your request.

Ideal applications for Folded Panels include:

- Industrial business parks
- Commercial properties
- Residential housing
- Schools
- Early childhood centres
- Sports fields and enclosures
- Shopping centres and malls
- Pedestrian access barriers
- Recreation facilities
- Carparks
- Motoway barriers
- Retention ponds
