

POOL & LANDSCAPE FENCING

Mr Fencer offers a wide range of quality pool and landscape fencing products to enhance the style, security and value of your property.

Homesafe Aluminium Tubular Fencing

Easy to install, durable and low maintenance, Homesafe Aluminium Tubular Fencing will bring style & safety to any environment it enhances.

Manufactured from attractive and tough, rust-free aluminium, then welded and powder coated, Homesafe is built to comply with all Australasian pool safety standards.

Mr Fencer will have in stock the two most most popular Homesafe Tubular Aluminium Fencing styles - FLAT TOP and PICKET - in standard powder coated satin black finish.

All other Homesafe fencing styles are available, with a standard delivery lead time of approximately 6 weeks. Likewise, a range of 4 other powder coating colours (Karaka, Hawthorn, Silver, and Grey) are available with an approximate 2 week lead time. Raked panels are also available to suit sloped sections.

Custom Fabrication

Should your pool and landscape fencing needs fall outside of the options provided here, Mr Fencer offers a complete suite of custom fabrication solutions to meet your unique requirements.

Our highly experienced manufacturing partner loves a challenge, so please contact us today to discuss your needs.

Freedom Glass Pool and Landscape Fencing

Freedom Glass Frameless Glass Pool Fencing

Our 12mm toughened frameless glass pool fencing combines luxury, beauty, design and safety in a modular system that has been designed to meet all Australasian Pool Safety Standards while easily accommodating your installation plans. Using modern 316 grade Stainless Steel spigots and fixings for strength and longevity, our frameless glass pool fencing has transformed existing pool areas into stylish, architecturally designed outdoor areas complimenting the rest of the property and surrounds. Our range of modular 12mm toughened glass panels are the epitome of design for any pool or garden fence.

Freedom Glass Semi-Frameless Pool Fencing

The Freedom Glass semi-frameless glass system uses 8mm or 10mm toughened glass panels, combined with powder coated aluminium glazing posts.

100 Series Semi-Frameless Glass:

When installed, the post height finishes in line with the glass. Posts are then topped with a low profile cap leaving the top and bottom of the panel free of any rails allowing an uninterrupted view to your pool or garden.

75 Series Semi-Frameless Glass:

The Freedom Glass 75 Series semi-frameless glass pool fence system uses the same range of 8mm or 10mm toughened glass panels as the 100 Series. The key point of difference is the posts are set approximately 100-130mm from the top of the panels, offering the high end 'frameless' look at a fraction of the cost. All this while still offering a safe and secure fencing option for your property.

TITAN™ Tubular Steel Landscape Fencing

TITAN™ tubular steel landscape fencing is manufactured and galvanised in New Zealand to ensure a consistently high level of product quality and integrity versus other inferior tubular steel fencing.

With a sliced-point spike top, TITAN™ fencing comes in standard 1900 mm (H) x 2370 mm (w) panels, which are also available to buy as fully welded raked panels.

Custom sizes are also available and we offer a range of matching gates to suit your needs.

With inherent anti-climb properties, TITAN™ landscape fencing is ideal for medium security applications including schools, security yards, and motorway fencing.

NEPTUNE™ Tubular Steel Pool and Landscape Fencing

Utilising TITAN™ fencing technology, NEPTUNE™ tubular steel fencing is now available to specifically meet pool and landscaping needs.

Delivering the same inherent product benefits as TITAN™, NEPTUNE™ pool and landscape fencing features a safety conscious flat top on each tube.

NEPTUNE™ is ideal for environments that require solid, yet stylish fencing, retaining walls and balustrades, and a full range of safety gates are available to match and complete your project.

HERCULES® PLUS Rigid Panel Fencing

HERCULES® PLUS is a highly rigid panel fencing solution built with durability and style in mind, making it a versatile product ideal for a wide range of landscaping applications including schools.

With its perfectly symmetrical 'H' profile, the round lines of HERCULES® PLUS give an elegant and discreet finish.

Panel Fencing

Mr Fencer offers two of New Zealand's leading panel fencing solutions from Anchor Wire Ltd and Hurricane Wire Products (Steel & Tube Holdings Ltd).

Panel Fencing is an extremely versatile and popular option across a wide range of applications including pools, spa pools and landscaping. Panel Fencing integrates well into both urban and rural settings, and is able to be attached to galvanised pipe, wooden posts, brick pillars, concrete and other building products.

Easy to install and replace, panel fencing is also resistant to climbing and vandalism thanks to an anti-scaling gap of vertical rods without horizontal hand or foot holds to present the maximum deterrent to climbers and vandals. Robust construction and hot dip galvanised finishing ensures panel fencing will offer many years of faultless service.
