

CHIEF PANELS & GATES

The Chief is a fully welded, 100% hot dip galvanised fence, manufactured from rigid high strength steel, available in rod top design.

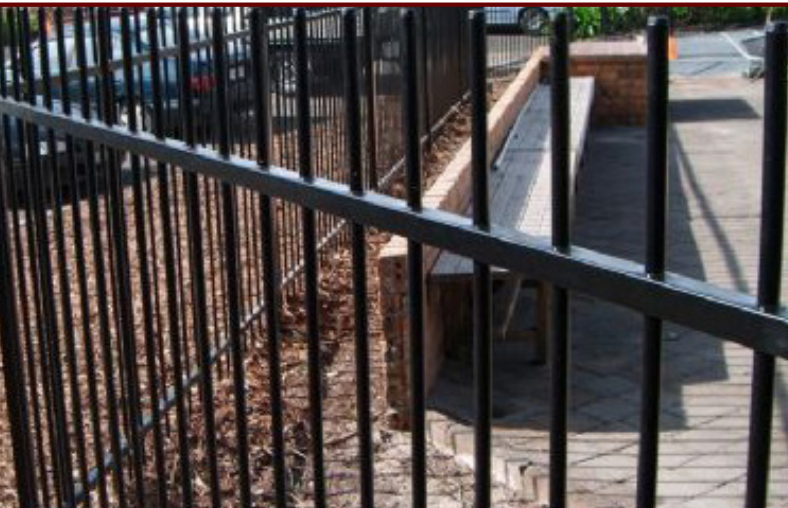

The Chief Security Fence is made from very durable 30mm square horizontals and 16mm round tubular verticals. Chief is a low maintenance, long life fence available as 100% hot dip galvanised or in a powder coated finish.

Each vertical is ended as a rod top, pressed spikes have not been added as a safety factor. Chief is a well constructed fence, is very strong and suited to environments that are subject to heavy traffic loads.

The Chief fence range is not face welded, rather, each vertical passes through the horizontal, providing additional strength and a classic finish.

Special fixing brackets allow each panel to be attached at an angle to the post upright, this allows for easy installation especially in irregularly shaped sites.

The Chief panel is available in 1.5m, 1.7m and 2.0m heights.

Ideal applications for Chief Panels include:

- Industrial business parks
- Commercial properties
- Residential housing
- Schools
- Early childhood centres
- Sports fields and enclosures
- Shopping centres and malls
- Pedestrian access barriers
- Recreation facilities
- Carparks
