

PALISADE PANELS & GATES

Palisade fence is the most aesthetically pleasing and strongest palisade product on the market. Each vertical offers industry leading anti-flexing characteristics.

Created through intelligent computer design, each vertical offers industry leading anti-flexing characteristics.

Palisade is manufactured in New Zealand from high density galvanized steel and meets or exceeds the New Zealand/Australia specification AS1397.

Palisade fence panels are extremely strong, resist flexing in any direction and can be easily retro-fitted.

The profiled pales have 91mm spacing, with two horizontals at 50x50x5mm. The fence panel is fully rakeable making it suitable for undulating sites. This makes it an ideal choice for a road barrier fence or any type of boundary fencing that you may require.

The Palisade panel is available in 1.8m and 2.1m heights.

Ideal applications for Palisade Panels include:

- Industrial business parks
- Commercial properties
- High security areas
- Sports fields and enclosures
- Shopping centres and malls
- Pedestrian access barriers
- Recreation facilities
- Carparks
