

## WIRE PRODUCTS

Mr Fencer offers a range of high quality wire products to meet most fencing applications, including Chainlink mesh fencing, custom PVC black Chainlink mesh, barbed wire, high tensile wire and high quality wire ties.

### Chainlink Mesh Fencing

Mr Fencer uses Chainlink mesh fencing that is manufactured in New Zealand using a market-leading Bergandi Chainlink weaver from the USA.

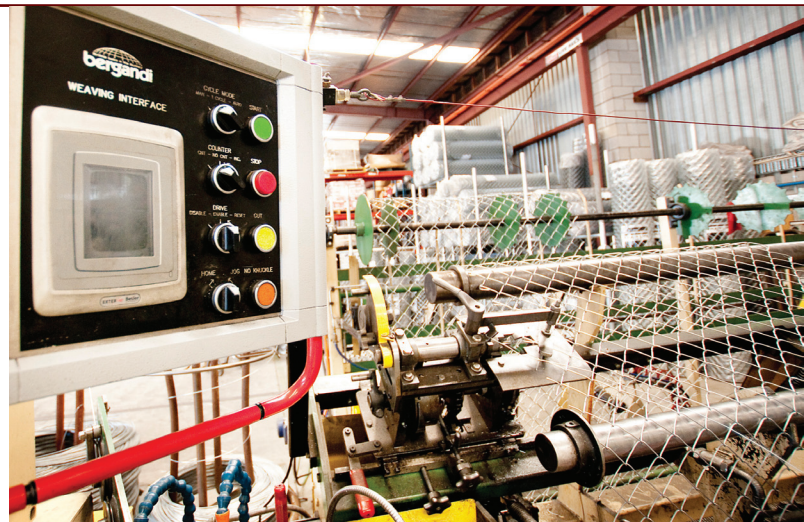

Our technology and strict quality control ensures our Chainlink knuckles are tight and links are not missed as sometimes happens with inferior weaving machinery.

**Our weaving machine is highly versatile and has considerable flexibility:**

- Wire gauge: 2.0mm to 3.15mm
- Diamond sizes: 25mm or 50mm Diamonds
- Mesh widths: 900mm to 3600mm Wide/High

Mr Fencer is also able to supply customised Chainlink orders of 50mm mesh up to 3.6m wide / high. In addition to our standard galvanized mesh products, we also source border fence in custom black PVC covered Chainlink.

We keep the most common mesh sizes (50mm diamond in 2.5mm and 3.15mm, and 50mm diamond black PVC in 3.6mm) in stock, and our manufacturers are able to produce special orders with quick lead times. We're also able to weave tighter 25mm diamond mesh in 2.5mm and 3.15mm gauge, perfect for instances where higher security or pest control is required.

### Ideal applications for Chainlink wire include:

- Security
- Industrial premises
- Residential
- Conventional pipe and mesh fencing
- School and sports grounds
- High security prisons
- Construction sites
- Carparks
- Airports
- Recreational facilities
- Golf courses
- Pest control
- Zoo enclosures

# A range of WIRE PRODUCTS to meet most fencing applications

## High Tensile Wire

High-tensile fencing wire is aesthetically pleasing, stronger than many other conventional fencing products, and it's virtually maintenance free.

It is also an excellent deterrent to intruders when electrified. A high-tensile wire fence is usually more secure, looks neater and lasts longer, with less maintenance than either barbed wire or woven wire fence.

Mr Fencer sells High Tensile 2.0mm wire in 50kg coils and 2.5mm High Tensile Galvanised Wire in 25kg coils.

### Ideal applications for HT wire include:

- Security fencing
- Heavy duty electric fencing
- Industrial fencing
- Coastal fencing
- Residential fencing
- Brace wires in end assemblies
- Conventional pipe and mesh fencing
- Farm fencing
- Line wire

## Barbed Wire

Mr Fencer offers high quality 1.7mm High Tensile Barbed Wire in 250m coils.

Perfect for added security on any standard fence, barbed wire is one of the most effective deterrents to unwanted intruders.

As a point of difference, our barbed wire products come with user-friendly handles for easier carrying and transport.

### Ideal applications for barbed wire include:

- Farm fencing
- Security
- Storage facilities
- Stock yards
- School grounds
- Sports facilities
- Motorway access points
- Power substations

## Wire Ties

Mr Fencer offer a range of high quality wire ties to ensure the best possible finish on your fencing projects:

- **WT150** - 150mm Wire Ties 1.6mm galv x 500 per bundle
- **WT200** - 200mm Wire Ties 1.6mm galv x 500 per bundle
- **WT230** - 230mm Wire Ties 1.6mm galv x 500 per bundle
- **WT250** - 250mm Wire Ties 1.6mm galv x 500 per bundle
- **WT300** - 300mm Wire Ties 1.6mm galv x 500 per bundle
